Goal 1: Students will develop a comprehensive, integrated knowledge base of normal and disordered communication

Outcome 1: Students will demonstrate comprehensive knowledge of the spectrum of communication disorders with the context of normal communication development and behavior

Outcome 2: Students will demonstrate a professional perspective about communication and its disorders within the context of society

Outcome 3: Students will be eligible for certification by the American Speech-Language-Hearing Association (CCC-SLP)

Outcome 4: Students will be eligible for licensure by the Wisconsin Department of Public Instruction (DPI) in speech-language pathology, if they choose to be eligible

Goal 2: Students will develop competent clinical skills with a broad range of communication disorders

Outcome 1: Students will demonstrate comprehensive knowledge of the intervention process of evaluation, treatment, and prevention of communication disorders

Outcome 2: Students will demonstrate the ability to function with minimum supervision in providing clinical services to individuals with a wide range of communication disorders

Outcome 3: Students will demonstrate skill at both written and oral communication related to practice

Outcome 4: Students will demonstrate ability to function within a team context in the workplace

Outcome 5: Students will obtain employment and function in satisfactory fashion in the workplace

Goal 3: Students will employ scientific methodology in establishing appropriate therapeutic intervention and critical consumption of new trends and concepts of the profession

Outcome 1: Students will demonstrate the ability to function independently in academic pursuits

Outcome 2: Students will demonstrate a professional perspective toward research and clinical practice based on knowledge of the scientific method

Outcome 3: Students will demonstrate professional behavior based on ethical, legal, and moral standards
