D. Polling

a. Run iclicker.exe. Select the desired course and then click on Start New Session. A toolbox will appear.

b. With the toolbox, you can choose among three question types, view student responses, and access settings. Before beginning any polling, you must initiate Roll Call Registration, which is found by clicking on the gear icon. Select Roll Call Registration and this window will appear that will cycle through your roster, allowing students to register by entering the three letter code given in the same box as their name. (You can adjust the allotted time by using the arrows under Time Remaining)
c. To begin polling, click on the green arrow located on the toolbar. A bar graph will appear with the student responses. When you are finished with the question, click on the red square located on the toolbar. You can indicate the correct response by clicking on the letter or the bar.

Click on the bar or letter

d. Previous questions can be accessed through the bar graph icon. You navigate through the questions with the arrows or drop down menu. Correct choices can be changed easily by clicking on the desired answer even if the poll has ended.

e. There are other options that may be helpful located in the gear icon, such as anonymous polling and course settings.
