POISED FOR SUCCESS
All academic programs at the University of Wisconsin-Eau Claire are focused on delivering the resources and opportunities students need to succeed after graduation, whether they enter the job market or graduate school.

Each year, UW-Eau Claire conducts a survey of recent graduates to evaluate outcomes, identify program strengths and uncover any possible areas of concern. This is how we maintain the highest standards of excellence in teaching and learning, and foster the kinds of skills relevant to today’s job market and critical for functioning in a future we can’t yet imagine.

Conclusions are based on the most recent post graduate survey, conducted in 2012.

WHAT LEADS TO SUCCESS

Completing Internships
Success after graduation comes from completing one or more internships while in college. It's one of many ways Blugolds find their passion and gain that competitive employment edge.

54% of 2011-12 graduates reported that they completed one or more internships. Some students complete their first internship as early as the summer after their freshman year. Career Services has partnerships with thousands of employers and posts more than 1,000 internship opportunities each year.

In a national survey of employers, almost three-quarters of respondents indicated they prefer candidates with relevant work experience and more than half prefer that it comes from an internship. Job Outlook 2013, National Association of Colleges and Employers (NACE)

Blugolds find their passion and gain that competitive employment edge.

Having a Career Goal
Success after graduation comes from defining a career goal. Of graduates who reported that they were employed, 96% told us that their job was related to their career goal. Many students either don’t have a career goal when they enter college, or change it as they progress through college.

Many students either don’t have a career goal when they enter college, or change it as they progress through college.

Gaining the skills employers seek
Success after graduation comes from acquiring the skills that employers are seeking.

The top 10 skills/qualities sought by employers, according to NACE’s Job Outlook 2013 survey are:
• Ability to verbally communicate with persons inside and outside the organization
• Ability to work in a team structure
• Ability to make decisions and solve problems
• Ability to plan, organize and prioritize work
• Ability to obtain and process information
• Ability to analyze quantitative data
• Technical knowledge related to the job
• Proficiency with computer software programs
• Ability to create and/or edit written reports
• Ability to sell or influence others

The rich liberal arts tradition at UW-Eau Claire lays the foundation for these skills. In addition to gaining the technical knowledge related to their discipline, our graduates are uniquely qualified to fit the needs of employers. Graduates of UW-Eau Claire learn to analyze and interpret information, form and express informed opinions, communicate effectively, understand individual and social responsibility, appreciate the richness of diversity among people and have knowledge of human culture and the natural world.

The PATH TO SUCCESS STARTS HERE
Persistence and proper preparation are crucial to long-term career success. UW-Eau Claire can help you cultivate a rewarding career path through invaluable work experiences, proven job search resources and intelligent networking. Let’s get started today!
