Wired Internet Information

All rooms will be hard wired for Internet access. Note that this internet traffic is shared with all students. Excessive bandwidth usage (music/video streaming and server applications) is highly discouraged and may be a contributing factor to either a slowdown or unavailability of access to the network. If you are found to be interfering with the internet access of other students, the offending process or device must be removed or your internet service will be suspended.

Please view the back of this page for instructions on how to get connected with your Linksys/Cisco switch and cable modem.

Internet Usage Policies

Use of the internet includes strict adherence to the Digital Millennium Copyright Act and related regulations regarding uploading or downloading of files on the internet. In addition, computer activities that violate Federal, State or local laws are also strictly forbidden.

Any violation of these policies will result in a formal complaint to the University and the termination of internet access to the student. In addition, any legal or financial issues arising from your use of the hotel’s internet system will be solely the responsibility of the student.
