Written for speech-language pathologists, this is a complete resource for teaching children production of early-developing sounds: /k/, /g/, /t/, /d/, /b/, /p/, /w/, /h/, /f/, and /v/. The Introduction and Background sections pull in peer-reviewed research to provide great detail related to the development of early sounds, assessment issues, and treatment techniques and strategies. The Treatment Guide for each sound pair includes screening forms, placement tools, book lists, lesson plans, word-, phrase-, and sentence-level activities, and tons of homework pages. Case studies and dozens of reproducible card sets and templates are also included.
