Commuter Dashboard

Riders have access to their own, as well as their organizations' ride data at the Derozap website.

Student participants can see how many rides, miles, calories, etc. they have accumulated as the site asks the participants to type in their home address. So it is possible to see the amount of mileage they have traveled.

Similar to the ZimRide program, reports and websites are customizable.

Administrator Dashboard

Similar to the ZimRide program, the administrator can use the web tools to monitor traffic, registrations and send personalized mass emails.
Reach of ZAP Reader
The ZAP reader can reach up to 30 feet, however, the typical “sweet zone” is within 5 to 15 feet.
