1. The 3000 seat per year estimate assumes 10,000 students graduating in 4 years. For an outcome requiring one experience during a student’s 4-year career, we would need (on average) 2500 seats per year to satisfy the demand from 10,000 students. A 500-seat “buffer” was built into the estimate to account for the inevitable class scheduling issues.

2. The LE dashboard is updated weekly with new courses that have been approved by ULEC and/or new LE course proposals that have entered the approval process (in progress). The dashboard accurately reflects (in real time) the courses approved by ULEC and those in progress.
