## Questions for Thought about Academic Technology on Our Campus

### Value of academic technology at your campus

- What educational needs are NOT currently being served with the existing eLearning infrastructure (technology, administrative systems, and support)?
- Is online learning a valuable component of the overall educational experience provided by our campus?

### Barriers

- What barriers do faculty and students face in instruction using technology currently?
- What are the barriers to using technology in the future?

### Current, future, planned educational technology use and perceptions

- What are the perceptions of the faculty, administrators and staff regarding eLearning?
- What role should distance education play within the overall scope of educational services at your campus?
- What are the most important areas where academic technologies will add value in the future?
- How well is your campus positioned to take advantage of the current and emerging academic technologies and delivery modes?
- What are the current and future needs?
