PROPOSAL TO CLOSE STUDY ABROAD PROGRAM AT University of KwaZulu-Natal-Durban, South Africa (INTA 338)

RATIONALE:

This action will remove from the university catalog a course that is no longer offered. The CIE was advised in fall 2008 that the University of KwaZulu-Natal (UKZN) in Durban, South Africa was unable to offer the six-credit, five-week summer program in summer 2009. This change was the result of a faculty vote to change its academic calendar, thus shortening the break between semesters from five to three weeks. As a result, they are no longer able to offer this program.

The CIE was able to identify a successful replacement program at the University of Stellenbosch, which was already approved by the APC, so that we remain able to accommodate students interested in spending the summer studying in South Africa.
