

1. Changes to Leadership certificate requirements.
  - a. Increase elective required credits from 5 to 6 (resulting in a 12 credit certificate requirement)
  - b. Allow up to 3 credits of 100 and 200 level MSL courses to count toward the certificate. (Certificate currently allows up to 2 credits.)
  - c. Add HCAD 302 Leadership and Management Practices in Health Services to the certificate electives
  - d. Add MGMT 345 Managing Global Organizations to count as one credit toward the Leadership certificate electives.

The following motions modify or rescind previously approved changes that do not yet appear in the catalog. (This is in response to loss of a tenure track position in the Management and Marketing department.)

1. Reinstate MKTG 338 as a required course in the Marketing major (all emphases).
2. New course MKTG 344, approved earlier this year will not go into the 2015 catalog
3. New course MGMT 344, approved earlier this year is modified per attached course master form.
4. Changes to requirements for the Operations and Supply Chain Management emphasis of the Management major:
  - a. Remove MGMT 443 Simulation Modeling and Analysis from the required courses, move to electives.
  - b. Add MGMT 344 (as modified above, Quantitative Methods for Management and Operations) as a required course. (Replaces BSAD 380 previously removed.)
5. Add MGMT 344 (as modified) as an elective in all other Management emphases as well as BSAD major.
6. Reduce number of credits required in the BSAD major from 43 to 40.
7. Revised unique credits requirement for BSAD major/COB certificate combinations: *Business Administration majors using a College of Business certificate to satisfy the university requirement for a secondary area of concentration must have 12 credits that are unique to the certificate. To the extent that the certificate requirements overlap required or elective courses applied toward the Business Administration major, the student must take additional electives (from either the certificate or the BSAD major) to meet the 12 unique credit requirement.*
8. Add MGMT 347 Risk Management and Insurance as an elective in the Management major (all emphases) as well as the BSAD major
9. Reconsideration of the 11/17/2014 motion from the Information Systems department to add MGMT 343, 344, 442 as electives to the Information Systems major (both emphases.) Management and Marketing department has indicated support of the motion. (Addition of ACCT 435 in the original motion as approved on 11/17/2014.)

Revised motion communicated by department chair Tony Keys: Add MKTG 338, MKTG 434, MGMT 442 as electives in the IS major (both emphases).
