

Dane County Summer 2007 Internship

From Jim Clark [Clark@co.dane.wi.us]

"I am the Director of Environmental Health for Dane County. We are anticipating that we will need a summer intern next year to assist with water sampling at beaches around the county. We would also provide opportunities to accompany our sanitarians in their work, which encompasses the full range of environmental regulation incl. food facilities, lodging, public swimming pools, septic system, water wells, lead poisoning prevention, radon, campgrounds and mobile home parks. We would be able to provide wages."
