Chaos Water Park Resort New Time Line

Eau Claire, WI (May 20, 2009)- The owners of Chaos Water Park Resort have shifted the time line for the park's Grand Opening, which was scheduled for 10am Friday, May 22 due to unpredictable and unforeseen circumstances.

The Wisconsin Building Inspector visited the park Tuesday afternoon, May 19 for a final inspection. Although all previous inspections were passed the final approval will be delayed at least one week. The delay is attributed to recent changes in Federal codes, as well as minor issues such extra padding needed on stairs, the height of the basketball hoop in the activity pool, a smoother coating on the concrete statues around the park to prevent scratches and additional railings required on the activity area to further prevent falls.

Safety is the main concern at Chaos Water Park. The park is a safe environment and will be in compliance with all rules and regulations prior to opening. This is why the owners feel it is important to delay the opening date to ensure all appropriate measures are in place.

Other code issues were passed with flying colors. The water quality is above federal standards and the flooring is a rubber floor which no other water park in the state has in place.

A new opening date has not been determined; however the state inspector is expected to return to the park next week.

Unfortunately the WYSP fundraiser scheduled for Thursday evening, May 21 cannot be held at Chaos. Instead, the event is moving to Action City from 4-9pm. Action City will donate 50% of the WYSP play package cost and 25% of all food purchased that evening.

Any and all media inquiries should be directed to Karen Kraus at the contact information provided above. For more information about water park rules and the permit process please consult Ramaker and Associates, the leading Wisconsin water park design company consulting with the Chaos Water Park owners, at 608-643-4100.
