Making the i>Clicker Work in the Classroom

1. The i>Clicker base receiver must be connected to your computer, if it is not already.
2. Students must turn on their i>Clicker remotes.
3. i>Clickers must be set to the correct frequency of the room (it will be posted in the classroom, or can be found on the i>Clickers page of the CETL website: https://www.uwec.edu/CETL/ActiveLearning/iclickers.htm)
   Near the bottom there will be a link titled “iClicker Room Codes”.
   a. To set the frequency, follow the instructions on the back of the i>Clicker remotes under “Change Frequency”.
   b. The frequency can be set for the i>clicker program in the “My Settings” section of your iclicker.exe startup window:
