Research and other scholarly and creative activities of the faculty, academic staff, and students are one of several means by which the University's primary mission of excellence in instruction is promoted. Such activities assist the university community in maintaining the high level of quality instruction while providing an effective means for attracting and developing well-informed students. I am pleased to note that this report includes many entries of publications, creative achievements, and extramural grants which have students as joint authors with faculty and academic staff members. Included in this publication are faculty/student collaborations, graduate student theses and research papers. These entries also reflect the research interests of the faculty because students work closely with them in pursuing their research efforts.

This report, together with the regular updates on extramural grants published in the University Research Newsletter, and the weekly reports of presentations at scholarly meetings and public service activities in the University Bulletin, document the creative and scholarly efforts of our faculty and academic staff.

Larry Schnack
Chancellor

PREFACE

Institutions of higher learning engage in research and creative activities as integral parts of their educational functions. It is through such activities that our knowledge is increased and achievements are made to further the well-being of the general public. The articles, books, published research reports, major recitals or other significant refereed creative achievements, graduate theses and research papers, extramural grants, and faculty/student collaborations produced by the faculty, academic staff, and students tend to serve as indicators of the contributions that the University of Wisconsin-Eau Claire is making to the expansion of knowledge and the arts. The University is pleased to acknowledge these achievements of its faculty, academic staff, and students.

This document represents, of course, only a small fraction of the total efforts of our faculty, academic staff, and students in research and creative activities. Some of our efforts do not lead to information that can be disseminated in externally published form. However, the level of effort recorded in this document is one measure of the achievements of the University of Wisconsin-Eau Claire.

Of the activities catalogued in this report, nine reasonably distinct categories can be identified:

1. publications which expand disciplinary frontiers of knowledge;
2. publications which transcend disciplinary boundaries by relationships with other disciplines;
3. publications which provide practical applications for research-generated knowledge;
4. publications which synthesize or reiterate research findings for newly identified audience;
5. creative published works;
6. significant refereed activities which transmit a cultural/artistic heritage and/or expand or deepen the audience's horizons;
7. extramural grants which provide funding for research and sponsored programs;
8. faculty/student collaborations which enrich the scholarly experience for all involved and result in a tangible product such as a paper, a poster, a presentation, a non-print media form, a musical composition, or a new chemical compound; and
9. master theses and graduate student research papers. Copies of the theses and research papers are held in the William D. McIntyre Library of the University of Wisconsin-Eau Claire and are available for public inspection. Theses on file in the McIntyre Library are listed in Master's Theses In Education and Master's Theses in the Arts and Social Sciences published by Research Publications, Cedar Falls, Iowa. The theses and research papers are included here to acquaint individuals both within and outside of the University with the diverse range of research and other scholarly activities undertaken by some of our graduate students as they pursue advanced degrees. Such a listing also reflects the research interests of the University faculty because the students work closely with them in pursuing their research efforts.

A University is a collection of diverse groups of individuals representing numerous areas of expertise. It is through such diversity and interaction of disciplines that the University of Wisconsin-Eau Claire gains its strength. This Report illustrates such diversity and interactions of our institution. Examples of the scholarly works cited in this report can be found on display in a special case located on the west side of the new entry corridor of McIntyre Library.
EXPLANATIONS, NOTES, AND COMMENTS

Distribution of the Report. All faculty and academic staff receive a copy of the Report, and each academic and administrative office receives three copies. A small stock of extra copies has been printed so that interested individuals may receive extra copies by calling (715) 836-3405. Suggestions and comments for improving the Report should be sent to Assistant Dean Christopher Lind.

Inclusions and Exclusions. Faculty and academic staff members with joint appointments have been listed under the single unit they selected as their primary appointment for purposes of this Report. The departmental affiliation of faculty, academic staff, and students is also noted. The index includes only those faculty and academic staff who were employees of the University and students enrolled between May 1993 and April 1994, and those students whose theses or research papers were accepted by the School of Graduate Studies between May 1993 and April 1994. In addition to publications and creative achievements during the 1993-94 academic year, this Report includes items bearing publication dates from 1 May 1992 to 30 April 1993 that were inadvertently omitted from the last report or actually published in 1993 (with an earlier date on the cover due to a journal being backlogged). The next issue will cover the period of May 1994 to April 1995. Every attempt has been made to be complete and accurate within the ground rules established for the Report. Members of the Editorial Advisory Board screened all entries as to their appropriateness for inclusion.

Acknowledgments. The Editorial Board appreciates the hard work and cooperation of those who assisted with this publication. Faculty and staff members who carefully and promptly completed their submission materials provided momentum, and administrative offices' submission and speedy transmittal of the materials further aided the work.
