University of Wisconsin-Eau Claire

ON THE COVER

Clockwise from top: *The HeART of Nursing: Expressions of Creative Art in Nursing* edited by M. Cecilia Wendler (p. 54), *Writing Short Stories: The Most Practical Guide* by William Phillips (p. 29), *Assessment in Sport Education* by Sean Bulger, et. al. (p. 45) and *Evidence-Based Practice for the Helping Professions: A Practical Guide with Integrated Multimedia* by Leonard Gibbs (p. 67).

A University is a collection of diverse groups of individuals representing numerous areas of expertise. It is through such diversity and interaction of disciplines that UW-Eau Claire gains its strength. This *Report* illustrates such diversity and interactions in our institution.

University of Wisconsin-Eau Claire

105 Garfield Avenue • P.O. Box 4004 • Eau Claire, WI 54702-4004

The *2002-2003 Report on Publications and Other Scholarly Achievements* includes publications, creative achievements, extramural grants, faculty-student collaborations, undergraduate and graduate student independent and directed studies, and research papers. We celebrate the breadth and depth of the scholarship on our campus, and we also recognize the wonderful and unique opportunities our students have to engage in collaborative work with our outstanding faculty and academic staff and with each other. Many of these projects have been made possible with funding from the University of Wisconsin-Eau Claire Foundation, Inc.

The products of scholarly and creative activity form a tangible means through which the University contributes to society and demonstrates the fulfillment of its commitment to excellence in education. Projects represented in this report enhance what is taught and learned in the classroom and confirm for the UW-Eau Claire community, the community at large, and for prospective students the University's dedication to the academic and intellectual development of its faculty, academic staff, and students.

Updates on scholarly activity can also be found in the *University Bulletin*, published weekly by the University's News Bureau.

Donald Mash
Chancellor

Excellence. Our measure, our motto, our goal.

Office of the Chancellor • Schofield 204 (715) • 836-2327 • fax: (715) 836-2902

P R E F A C E

Institutions of higher learning engage in research and creative activities as integral parts of their educational functions. It is through such activities that our knowledge is increased and achievements are made to further the well-being of the general public. The articles, books, published research reports, major recitals or other significant refereed creative achievements, research papers, extramural grants, and faculty/student collaborations produced by the faculty, academic staff, and students serve as indicators of the contributions that the University of Wisconsin-Eau Claire is making to the expansion of knowledge and the arts. UW-Eau Claire is pleased to acknowledge these achievements of its faculty, academic staff, and students.

The 2002-2003 Report on Publications and Other Scholarly Achievements represents, of course, only a small fraction of the total efforts of our faculty, academic staff, and students in research and creative activities. Some of our efforts do not lead to information that can be disseminated in an externally published form. However, the level of effort recorded in this *Report* is one measure of the achievements of UW-Eau Claire.

Of the activities catalogued in this *Report*, eight reasonably distinct categories can be identified:

1. publications which expand disciplinary frontiers of knowledge;
2. publications which transcend disciplinary boundaries by relationships with other disciplines;
3. publications which provide practical applications for research-generated knowledge;
4. publications which synthesize or reiterate research findings for newly identified audiences;
5. published creative works;
6. significant refereed activities which transmit a cultural/artistic heritage and/or expand or deepen the audience's horizons;
7. extramural grants which provide funding for research and sponsored programs;
8. faculty/student collaborations which enrich the scholarly experience for all involved and result in a tangible product such as a paper, a poster, a presentation, a non-print media form, a musical composition, or a new chemical compound.

A university is a collection of diverse groups of individuals representing numerous areas of expertise. It is through such diversity and interaction of disciplines that UW-Eau Claire gains its strength. This *Report* illustrates such diversity and interactions of our institution. Examples of the scholarly works cited in this *Report* can be found on display in a special case located on the west side of the entry corridor of McIntyre Library.

EXPLANATIONS, NOTES, AND COMMENTS

Distribution of the 2002-2003 Report on Publications and Other Scholarly Achievements. All faculty and academic staff may view an electronic copy of the *Report* at www.uwec/ORSP/publications.htm. A small number of extra copies have been printed and may be requested by calling 715/836-3405. Suggestions and comments for improving the *Report* should be sent to Assistant Vice Chancellor Christopher Lind.

Inclusions and Exclusions. Faculty and academic staff members with joint appointments have been listed under the single unit they selected as their primary appointment for purposes of this *Report*. The departmental affiliation of faculty, academic staff, and students is also noted. The index includes only those faculty and academic staff who were employees of UW-Eau Claire and students enrolled between May 2002 and April 2003. Students whose abstracts were accepted by the Office of Research and Sponsored Programs for inclusion in the Eleventh Annual UW-Eau Claire Student Research Day on April 28, 2003 are also included in the *Report*. In addition to publications and creative achievements during the 2002-03 academic year, this *Report* includes items bearing publication dates from May 2001 to April 2002 that were inadvertently omitted from the last report or actually published in 2003 (with an earlier date on the cover due to a journal being backlogged). The next issue will cover the period of May 2003 to April 2004. Every attempt has been made to be complete and accurate within the ground rules established for the *Report*. Members of the Editorial Advisory Board screened all entries as to their appropriateness for inclusion.

Acknowledgments. The Editorial Board appreciates the hard work and cooperation of those who assisted with this publication. Faculty and staff members who carefully and promptly completed their submission materials and Betty Feia in the Office Research and Sponsored Programs who critically proof read the Report and further aided the work.
