Summer General Labor (SGL) Positions

Northern Industrial Sands is the premier, year-round miner and processor of Wisconsin northern white silica sand. Northern Industrial Sands offers the ultimate blend of experienced industry leaders, state-of-the-art mining technology, exceptional northern white sand and a solid supply chain.

We have several Summer General Labor (SGL) positions that will be focusing on different aspects of silica sand mining and processing. Our UW-EC SGL will work alongside personnel at both the Wet Plant and Dry Plant facilities. Northern Industrial Sands’ plants are in Barron County, WI, approximately 42 miles north of Eau Claire on good highways.

Key Responsibilities:

- Learn, understand and practice MSHA (Mine Safety and Health Administration) requirements as applied to the Barron County Plants.
- Work alongside our team to support the 6S for a Lean Workplace.
- Master Dry and/or Wet Plant Utility Operations.
- Assist with other plant projects, as assigned.
- 2-2-3 Work Schedule (this means you are off every other weekend all summer!).

SGL Requirements:

- Must be at least 18 years old and majoring in Geology or a corresponding field at UW-Eau Claire.
- Must have a GPA of $\geq 2.0$ and have successfully completed one Geology class.
- Approx. 40 hours per week between June 11, 2018 and Aug. 18, 2018. These dates are flexible, and an exception will be given to students enrolled in Field Camp II.
- Excellent verbal and written communication skills.
- Punctual, trustworthy, good work ethic and willing to do physical labor.

Interested Students are asked to submit a cover letter and resume to Northern Industrial Sands, Attn: Larry McGlumphy via UW-Eau Claire’s Handshake job recruiting platform.

To access the Handshake recruiting platform at the UW-Eau Claire Career Services website, follow: [http://www.uweccareerservices.org/](http://www.uweccareerservices.org/)

Application Deadline: Friday, February 16, 2018

Northern Industrial Sands is an Equal Opportunity Employer.
