The finance program prepares students for success through a curriculum that includes a strong liberal education core, and major-specific coursework that provides in-depth knowledge of finance and business. The program also helps students develop communication, teamwork, and problem solving skills, which are highly valued by organizations seeking to employ finance professionals.

Graduates work at financial institutions, investment firms, and insurance companies where they are bankers, stockbrokers, financial analysts, portfolio managers, and financial planners. Finance students who elect a second major in actuarial science obtain positions as actuaries.
