

# Master of Science in Data Science

The Master of Science in Data Science is a 12-course, 36-credit online master's degree in the fast-growing field of data science. The program will be the first online master's degree in data science ever offered in the UW System. Designed with input from industry leaders, it will offer a rigorous, multidisciplinary curriculum grounded in computer science, math and statistics, management, and communication. Students will learn how to clean, organize, analyze, and interpret large and complex data sets using the latest tools and analytical methods. Students in the program will enjoy affordable tuition that compares favorably to competing graduate programs from other institutions. Like other collaborative online University of Wisconsin programs, students will pay the same tuition whether they live in Wisconsin or out-of-state.

## Goals:

- Harness the power of large and complex data sets
- Use the latest tools and analytical methods
- Enjoy the flexibility of online courses
- Engage with expert University of Wisconsin faculty
- Pay the same affordable tuition, in or out of state
- Graduate from an institution employer's respect
- Prepare to take your career to the next level

## Where you'll find our grads

This degree can be the foundation for a variety of positions, including:

- Data scientist
- Data or research analyst/manager
- Data warehouse architect
- Enterprise strategy consultant
- Business intelligence manager/analyst
- Hadoop engineer

- Market intelligence analyst/manager

## Prepared for Success

The master of science in data science degree is intended for students with a bachelor's degree in math, statistics, analytics, computer science, or marketing; or three to five years of professional experience as a business intelligence analyst, data analyst, financial analyst, information

technology analyst, database administrator, computer programmer, statistician, or other related position. Opportunities abound for data science professionals in virtually every sector: manufacturing, construction, transportation, warehousing, communication, science, health care, computer science, information technology, retail, sales, marketing, finance, insurance, education, government, law enforcement, security, and more. Data science is a fast-growing field and demand is high for professionals with the skills to transform large and complex data sets into actionable information and competitive advantage. A UW-Eau Claire Master of Science in Data Science degree will teach you how to clean, organize, analyze, and interpret unstructured data, deriving knowledge and communicating your discoveries clearly using sophisticated visualization techniques and other means.

## Special Admission Guidelines

Admission to the Master of Science in Data Science program requires:

- A bachelor's degree and a cumulative grade point average (GPA) of 3.0. Official college transcripts are required. Students with a GPA of less than 3.0 may be considered for a provisional admission. Please contact an enrollment adviser for more information—see contact information below.
- Prerequisite coursework in elementary statistics, introductory
