2016 Asia Poster Tour exhibition under a theme of 'Color' is a collaboration among 274 Asian designers from 6 different countries. My work created for the exhibition, '各人各色', illustrates the designer's aspiration that our global community can be harmonious by respecting differences in color, opinion, gender, culture, religion, ideology, and so on. '各人各色' literally means that each person has his or her own color. Each dialogue balloon implies an individual's voice (their own respective thoughts) as well as their own being.
