What is Community Connections Team?
A program that goes beyond the walls of the health care clinic and helps patients connect with community resources to meet their basic needs including:

- Caregiver support
- Childcare
- Clothing
- Dental care
- Food assistance
- Fuel/utility costs
- Job search
- Health care costs
- Housing
- Medication costs
- Transportation

What do Community Health Workers (student and community volunteers) do?

- Work side-by-side with patients to prioritize basic needs.
- Locate and connect patients with community resources to be healthy.
- Provide follow-up to assure patients are connected with the correct resources.

Benefits to Becoming a Community Health Worker:

- Develop the skills and knowledge that position you to be a leader in the healthcare system of the future.
- See the broader side of health care by assisting patients meet their basic human needs.
- Gain an appreciation for agencies in the community that can assist.
