University of Wisconsin - Eau Claire
The 2006-2007 Report on Publications and Other Scholarly Achievements highlights the scholarly and creative activities of faculty, staff and students that are a hallmark of the University of Wisconsin-Eau Claire.

UW-Eau Claire provides unique opportunities for undergraduate students to engage in collaborative work with outstanding faculty and staff, as well as each other – resulting in students being well-prepared for graduate studies or careers in their chosen fields. These kinds of partnerships are invaluable because they extend what is taught in the classroom to create contributions that expand knowledge and foster the intellectual development of those involved.

This report includes publications, creative achievements, extramural grants, faculty-student collaborations, undergraduate and graduate student independent and directed studies, and research papers. Many of these projects have been made possible with funding from the students themselves, through differential tuition, from the University of Wisconsin-Eau Claire Foundation, Inc., and from UW System support for the Center of Excellence for Faculty and Undergraduate Student Research Collaboration.

Updates on scholarly and creative activities also may be found in the University Bulletin, published weekly by the UW-Eau Claire News Bureau.

Brian Levin-Stankevich, Ph.D.
Chancellor

Excellence. Our measure, our motto, our goal.
“The University of Wisconsin-Eau Claire is a comprehensive university whose purpose is to foster the intellectual, personal, social, and cultural development of its students…. The University places a special emphasis on experiential learning activities, such as international studies, faculty-student research collaboration, internships, and community service. UW-Eau Claire is the University of Wisconsin System’s Center of Excellence for Faculty and Undergraduate Student Research Collaboration.”

~ from the UW-Eau Claire mission statement

Scholarship involves producing new knowledge, developing novel perspectives, and creating artistic works that expand perception. These activities are at the heart of the university. Members of the UW-Eau Claire community are involved in a very wide range of scholarly activities. Faculty and staff probe the margins of their disciplines. This inspires them to bring exciting ideas to students, further stimulating intellectual curiosity. Students then become directly involved in scholarship in collaboration with faculty or staff mentors. UW-Eau Claire fosters these collaborations in a number of ways through the Center of Excellence for Faculty and Undergraduate Student Research Collaboration, which is funded primarily through student differential tuition as well as UW-Eau Claire Office of Academic Affairs, the UW-Eau Claire Foundation, and the UW System. Funds are available to assist students, faculty, and staff to pursue their scholarly activities year-round, and to travel to professional conferences to present the results of their work to disciplinary peers. We also celebrate and share scholarly achievements in various campus events such as Student Research Day, the Authors Celebration, and the Faculty/Staff Forum, and on the Office of Research and Sponsored Programs Web site.

The items listed in the 2006-2007 Report on Publications and Other Scholarly Achievements represent the tangible results of scholarly activities and collaborations, which include a wide variety of publications and refereed creative achievements, as well as proposals to extramural agencies for funds to enhance support for scholarship and creative activity. There are also many intangible results. Faculty and staff remain enthusiastic and closely connected to their field of study. Students become more versed in their disciplines, gaining skills that are invaluable in any walk of life: the ability to conceive a question, design a strategy to answer it, and carry the work through to completion and dissemination of their results. This ability to continue learning beyond their college years is a primary goal of the liberal arts education provided at UW-Eau Claire. We are very proud of our students and alumni, who contribute their knowledge and creativity, their skills in analysis, synthesis and critique, their social responsibility, and their generosity of spirit towards the betterment of communities across Wisconsin, the nation, and the world.

Distribution of the 2006-2007 Report on Publications and Other Scholarly Achievements. An electronic copy of the Report is available for viewing online on the ORSP Web site: www.uwec/ORSP/publications.htm. A small number of extra copies has been printed and may be requested by calling 715/836-3405. Suggestions and comments for improving the Report should be sent to Assistant Vice Chancellor Karen Havholm, or e-mailed to orsp@uwec.edu with the subject line “Suggestions for ROP.”

Entry Format. Faculty and academic staff members with joint appointments have been listed under the single unit they selected as their primary appointment for purposes of this Report. The departmental affiliation of faculty, academic staff, and students is also noted.

Inclusion Policy. The index includes only those faculty and academic staff who were employees of UW-Eau Claire and students enrolled between May 2006 and April 2007. Extramural grants made to faculty and academic staff, as well as internal grants, such as the Summer Research Experience for Undergraduates program, are included in the Report as well. Students whose abstracts were accepted by the Office of Research and Sponsored Programs for inclusion in the Fifteenth Annual UW-Eau Claire Student Research Day on May 1-2, 2006 are also included in the Report. In addition to publications and creative achievements during the 2006-07 academic year, this Report includes items bearing publication dates from May 2005 to April 2006 that were inadvertently omitted from the last report or actually published in 2007 (with an earlier date on the cover due to a journal being backlogged). The Report’s next issue will cover the period of May 2007 to April 2008. Every attempt has been made to be as complete and accurate as possible within publication guidelines.

Acknowledgments. The Editorial Board appreciates the hard work and cooperation of those who assisted with this publication, particularly faculty and staff members who carefully and promptly completed their submission materials.
