

New LMS - Student and Faculty Feedback Requested

The UW-System is adopting Canvas to replace D2L, starting in the Fall of 2018! After an exhaustive selection process, Canvas was determined to be the best fit. Canvas provides a student-friendly, accessible learning experience and instructors benefit from ease of use and innovative tools for grading and providing student feedback. Visit the [Eau Claire Canvas](#) page for more information.

The Canvas template team recently surveyed faculty, staff, and students from all UW-System campuses for their feedback on Version 1 of the Canvas course template. This feedback informed the development of Version 2 of the Canvas course template. We would like your input on Version 2.

An [8-minute video](#) provides background on the project and a demonstration of the Canvas environment and template. In addition, the [Canvas Template Version 2 Guide](#) describes the Canvas features found in course template Version 2.

Please view the video, log into the course to view it from the student perspective, and complete the survey by **Friday, December 29, 2017**.

Login Information
